

Using Child Car Restraints

1 Top Tether

Top tether must always be securely attached to the anchorage point.

2 Shoulder Height Marker

Use the shoulder height markers to help you move your child to the next stage at the right time.

3 Head Rest

For a safe fit, position the head restraint in line with the top of your child's shoulders.

4 Expiry Date

For safety, child car restraints must not be used after the 10-year expiry date.

5 Harness Straps

For a safe fit, keep the harness straps level with your child's shoulders.

General Road Safety

- Buckle up every car ride.
- All seats must meet Australian Safety Standards
- Take regular breaks on long trips.
- Never leave a child in a car, even on the quickest errand.
